Commissioner

RE: Collier Road Water Main Extension Project

Dear Stakeholder:

Starting July 12th, the City of Atlanta will begin work to install a new water main on Collier Road between Ardmore Drive and Dellwood Drive. The work will take place from 9 a.m. to 4 p.m. Monday through Fridays and should be completed by August 2nd.

This project will improve the water supply to Piedmont Hospital. This work will include:

- Connecting the 16-inch water main on the West side of the CSX Railroad Bridge on Collier Road to the existing 16-inch main on the East side of the bridge.
- A new 16-inch water main will branch off from the existing 90-degree bend of the 16-inch water main on Collier Road at Dellwood Drive and run to the CSX Railroad Bridge.
- At the bridge, the water main will be reduced to 12-inches. On the East side of the bridge, the water main size will be increased to 16-inches and will be installed beneath the surface.
- The 16-inch main will be connected to the existing 16-inch main at Arden Drive.

Rockdale Pipeline has been contracted to perform the installation and Collier Road will be reduced to one lane of traffic while construction takes place. We understand this work may be disruptive, but we will do our best to minimize any inconvenience to you. This work is a key part of the Clean Water Atlanta plan to ensure clean, safe drinking water for Atlantans and our downstream neighbors. If you have any questions, please contact me at 404-589-2674 or access our website at www.atlantawatershed.org. We appreciate your patience as we work to improve the water system that serves your community.

Sincerely,

William S. Horton
Public Information Manager, Sr.
